Abstract

Antes SIPAS, Mi Mutual es una aplicación web compuesta por distintos módulos de software con arreglo a todas las actividades necesarias que soportan la operación de los productos y servicios que ofrece la Unidad de Solidaridad y Seguros de la Cooperativa.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Impact Statement

Some Cambridge Prisms Journals (WAT,) require an ‘Impact Statement’ section. Comment out this section if it is not required.

Insert A head here

This demo file is intended to serve as a “starter file”. It is for preparing manuscript submission only, not for preparing camera-ready versions of manuscripts. Manuscripts will be typeset for publication by the journal, after they have been accepted.

By default, this template uses `biblatex` and adopts the Chicago referencing style. If you are using this template on Overleaf, Overleaf’s build tool will automatically run `pdflatex` and `biber`. If you are compiling this template on your own local L^AT_EX installation, please execute the following commands:

1. `pdflatex sample`
2. `biber sample`
3. `pdflatex sample`
4. `pdflatex sample`

Some journals e.g. `journal=aog|jog|pasa` require Bib_TE_X. For such journals, you will need to

- delete the existing `\addbibresource{example.bib}`;
- change the existing `\printbibliography` to be `\bibliography{example}` instead.

Overleaf will run `pdflatex` and `bibtex` automatically as needed. But if you had first compiled using another `journal` option that adopts `biblatex`, and then change the `journal` option to one that adopts Bib_TE_X, you may get some compile error messages instead. In this case you will need to do a ‘Recompile from scratch’; see https://www.overleaf.com/learn/how-to/Clearing_the_cache.

On a local L^AT_EX installation, you would need to run these steps instead:

1. Delete `sample.aux`, `sample.bbl` if these files from a previous compile using `biber` still exist.
2. `pdflatex sample`
3. `bibtex sample`
4. `pdflatex sample`
5. `pdflatex sample`
